

# SELF MASTERY SCHOOL OF CREATION

## The Advanced Program

If you enrol in the advanced program, you will receive all of the core program materials plus all materials for the electives you select from Advanced Program.

**The 3 elective modules from THE ADVANCED LEVEL PROGRAM are:**

1. **Elective 1 - Sound and Light Healing** – An Advanced Level Elective which supports a student to receive live training sessions via teleconference or chat rooms, igniting specific new levels of connection in their chakras so they may open and clear their Sound and Light Channel.

It offers a student the training to activate as a Sound and Light Channel, whereby they open their divine connection to the celestial and/or ancestral realms to channel the pure sound and light frequencies that are specifically needed to clear a soul's central channel and energy field of the primary energy and consciousness blockages that are presently limiting their personal empowerment, creative power of freedom and spiritual connection.

This module is also a prerequisite for The Empowerment Retreat, that offers the last stage of training for a student to become an accredited practitioner. This elective is recommended to all students enrolled in the School of Creation even if they do not wish to become an accredited practitioner in the future. This elective is extends through all three terms of the school. This module consists of 1 unit of study.

2. **Elective 2 - Multidimensionality** – An Advanced Level Elective that guides a student through their Multidimensional Nature and offers karmic clearings with their Monad (Soul Extensions) and Multidimensional Lightbody. This elective is available through the second and third terms of the school. This module consists of 1 unit of study.
3. **Elective 3 - The Sacred Mysteries of Temple Work** – An Advanced Level Elective that guides a student to train in the Temples of the Spiritual Planes for the following three purposes: Energybody work, Creation Work and Communion. This elective is available through the second and third terms of the school. This module consists of 1 unit of study.
